HiLogic
Helping You Enable Value

Adopting an agile approach to deliver major business change effectively & value faster

What is AgilePgM?

The philosophy of Agile Business Change is that "best value emerges when business changes are aligned to clear business goals, deliver frequently and are powered by the effective leadership of fully engaged, autonomously collaborative teams".

AgilePgM is designed with this philosophy in mind and with agile practices such as iterative and incremental delivery for outputs and benefits realization.

The AgilePgM guide and training has been developed in partnership with the Agile Business Consortium, the custodians of the internationally recognized agile project management standard AgilePM.

AgilePgM provides a disciplined but flexible agile approach for the management of major business change. It enables a programme and change team to play a critical role in ensuring the programme is able to fulfil its aims and vision.

It presents a philosophy, principles, processes, roles and documentation required to support an agile programme achieve its business change aims and vision.

The agile programme management philosophy is that an agile programme delivers what is required, when it is required – no more no less

The AgilePgM framework is underpinned by five principles supporting effective agile delivery of a major business change:

➡ Programme goals are clearly and continuously aligned to business strategy

➡ Benefits are realised incrementally and as early as possible

➡ Governance focuses on creating a coherent capability

➡ Decision-making powers are delegated to the lowest possible level

➡ Agile programmes are iterative and have the ability to contain both agile and non-agile projects

An Agile approach to change, is one that is designed to reap benefits often and early.

AgilePgM® - Agile Programme Management

Adopting an agile approach to deliver major business change effectively & value faster

AgilePgM Training & Certification

Target Audience

AgilePgM training and certification is aimed at programme and change managers and others involved with major business change initiatives, who wish to adopt a flexible and collaborative programme management approach that integrates agile philosophy and practices.

2 day AgilePgM Foundation Program

By the completion of the training a participant will understand:

➡ The underpinning philosophy and principles of AgilePgM

➡ The lifecycle of an AgilegPgM programme

➡ The essential products produced during an AgilePgM programme

➡ Governance approaches to ensure the programme of change is agile

➡ Communication and stakeholder management within an agile programme

➡ The planning, delivery, management and control practices to support a successful agile programme and its associated projects

➡ People in an agile change programme and how they are important to its success

The Foundation course covers:

➡ What is Agile? What is AgilePgM?

➡ The AgilePgM philosophy and principles

➡ AgilePgM lifecycle and products overview

➡ AgilePgM roles and responsibilities

➡ Stakeholder management

➡ Governance in an agile programme environment

➡ Planning, delivery, monitoring and control (including risk management) in an agile programme

➡ Quality in an agile programme

➡ Revision & preparation for the AgilePgM Foundation exam
